polypool

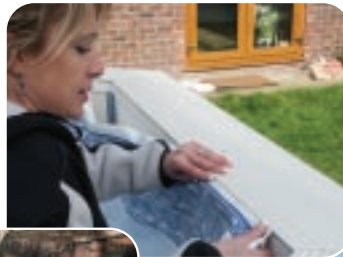

From this... to this in only 1 hour

Rigid insulated panels, light and easy to handle

Adding the finishing touches

Easy to follow instructions

All my own work...well almost!

An hour later and I'm not even out of breath

Adding the magic ingredient

“ I could not believe how simple it was to assemble the pool. The instructions were easy to follow (but guys – even you need to read them!). The panels are so light and easy to handle. The tools are provided. So, despite ‘helpful’ advice from the family, after only an hour I was adding the final magic ingredient – water. Now there is only one problem – getting the kids out of the pool to do their homework. ”

“p.s. – I have to say the whole process is so simple, even a man could do it!”

poly
THE WORLD'S MOST EFFICIENT POOL CONSTRUCTION SYSTEM

SAVES ON HEATING COSTS

KEEPS COLD OUT

Patented HEAT RETAINING thermal wall panels

for example

For a 5.2m pool with the temperature set at 28° C and the average difference being 10° C over a 24 hour period, the saving in electricity would be approximately **£4** a day.

* Pool shown is with optional extra Porthole Window panel

THE Sunshine RANGE

pool™

Our patented heat retaining panels act as a thermal break keeping heat within the pool, resulting in dramatic energy savings and sustained warm water. The result... a reduction in running costs year after year after year.

- Patented heat retaining panels make dramatic savings on heating costs.
- Modular construction with outstanding simplicity makes assembly quick and easy.
- The above-ground pool is easy to dismantle for winter storage.
- Does not require a concrete base.
- Can be erected on a lawn by removing the turf or on a patio.
- Easily transportable... take it with you when you move.
- Ultra rigid construction - enabling you to sit on the pool's ledge.
- Optional porthole viewing panel for extra safety.
- Fabulous range of exterior panel colours.
- Range of liners with choice of tile bands.
- Choose from Polypool's range of heating options and control systems.

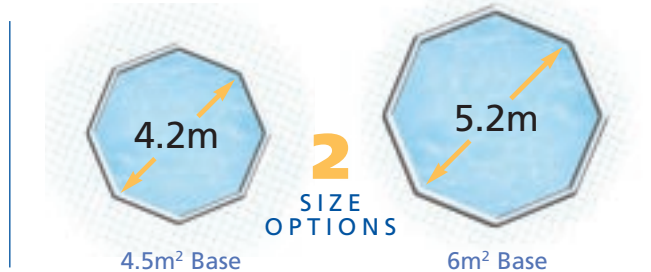

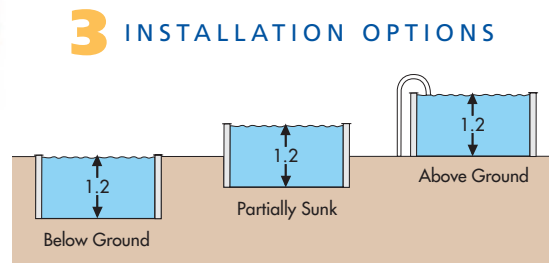

HEAT LOSS THROUGH
POOL WALLS
REDUCED BY **98%**
*(When compared to
a conventional pool).*
